#### F.a.q.

**Q:** Do you need to oil the wood?

**A:** Just like other types of wood, Iroko will gradually become rougher and start to turn grey as a consequence of exposure to the sun and rain. Small cracks and crevices can also appear as part of this process. We strongly advise everyone to treat the furniture with our Wood Protector. This 100% natural oil controls the moisture level within the wood, which makes the planks stay stable for longer, and the layer of oil also helps to prevent spilled liquids from being absorbed, so that stains tend to stay superficial. It is best to repeat this treatment at regular intervals.

**Q:** All benches on the highest level = a table for 12 people?

**A:** Yes, but this position is not meant to be used all the time.

#### Floor fastening

Gargantua comes with an optional floor anchoring set: four steel plates to be fixed with bolts.

#### Bench fastening

For public spaces, Gargantua comes with an optional bench fastening set: four galvanized steel brackets to be fixed to the legs.

#### Good to know

- The hole in the tabletop to place a parasol in is ø65 mm.
- Gargantua combines perfectly with Inumbra ø350, ø400 & Inumbrina ø380. For both combinations, a connection piece is required.
