Blowing away the boundaries of the workspace

You are invited to the Easy Breezy Office!

Note: This is not your typical Orgatec booth. We welcome you to our open-air workspace, set high in the sky, where you will witness first hand how our shade systems stand strong in any weather. Prepare to be blown away -- literally - by our latest solutions for working outdoors. Come and experience the future of work.

Working in the open air means more than just wind in your hair—it means recharging, re-energizing, and soaking up some much-needed vitamin D. Sunshine draws us to outdoor workspaces for the benefits it brings, but it can also present a few challenges, like screen glare or sunscreen-slick hands that slip off the keyboard. However, with the right solutions, we can overcome these hurdles and fully enjoy the perks of outdoor work. At our Orgatec booth, you'll see how our 'tools for togetherness' help create comfortable, productive outdoor work environments, whatever the weather.

” *“Recharging our mental energy is more important than ever, and reconnecting with nature is key to that process. It’s in our human instinct to seek out nature”*

— Dirk Wynants

Our solutions

A wind of change has swept through the traditional office space. For many years, we've focused on enhancing employee happiness in the workspace. It all began with making break-out spaces for lunch or coffee breaks more enjoyable. In doing so, we started blurring the traditional boundaries of the workspace. Today, we want to show you how to blow away those boundaries completely. Our tools for togetherness now offer solutions for every single office activity, anywhere: focused work, meetings, collaboration, creative brainstorms, lunch, and just as importantly, rest and retreat. And where better to enjoy these activities than in natural surroundings? There's nothing good design can't solve — the outdoor office is no longer just a dream.

What's new?

Manille:

a compact picnic table seating four, with optional shade system and durable materials. It can easily be extended in long rows with the connection piece, transforming it into a long desk or meeting table. Manille is designed to effortlessly add the shade system, secured to the backrests with four simple poles, ensuring a super sturdy and safe setup at a low cost.

Fixed shade for Manille:

we're unveiling our brand-new fixed (or permanent) shade for Manille for the first time in Cologne. Watch it stand up to gusts of wind right in the expo hall, and join us for an "easy breezy" office meeting!

Tiki cart:

our Tiki stool and Tiki folding table have been around for a few years, but with our Tiki Cart, you easily move and store away a dozen stools at once!

Panigiri with power supply:

making its debut as the centerpiece of the outdoor office, Panigiri is ideal for both meetings and focused work, with power available at every seat. This large, royal-sized picnic table can be extended with four additional seats per segment, and for each segment, you can choose between benches or chairs based on the intended use.

As the ultimate flexible outdoor office table, AMAi will be featured too of course. Change your working height in seconds, add light, tv screen, shade, and power supply and get things done. And not to forget, we will present you with Walrus for the afterwork hours. Enjoy a soft, cozy seat outdoors with colleagues, no matter the season, without the hassle of lugging cushions around.

The real outdoor office brand

At Extremis, we aim to bring people closer together—anytime, anywhere—whether at home or in the office. Given how much time we spend working, shouldn't we make it as enjoyable as possible? Numerous studies show that working outdoors, closer to nature, boosts both health and productivity. Extremis products are built to withstand real outdoor conditions, designed for a lifetime of use.

Additionally, research shows that human interaction positively affects happiness. That's why Extremis creates tools that foster collaboration and communication, transforming individuals into cohesive teams—indoors or outdoors, without limitations. We believe this is the future of work.

**Come and experience
the future of work**

22 – 25 October
Orgatec, Cologne
Hall 10.2, stand J-001

About Extremis

Extremis was founded in 1994 by Dirk Wynants. The Extremis furniture design collection represents products that are both necessary and useful. Their "tools for togetherness" focus on human interaction, intelligent problem-solving and sustainability with the ambition to improve lives. Extremis has its headquarters in Poperinge, Belgium, the design furniture is very popular in all corners of the world.
